

Plant extract --- Hawthorn extract

Hawthorn extract, Hawthorn Fruit extract, fructus crataegi extract, maybush extract, maytree extract

NAME: **HAWTHORN EXTRACT**

FUNCTIONAL INGREDIENT:

Flavone

CONTENT:

5%

APPEARANCE:

Fine powder

PARTICLE SIZE:

80 mesh

HEAVY METAL:

<20ppm

Brief Introduction:

Plant extract --- Hawthorn extract

Chinese hawthorn fruit extract is made from the tiny red berries that grow on the Hawthorne shrub (*Crataegus oxyacantha*). Hawthorne berries as well as the leaves and flowers have been used in traditional medical systems since ancient times. Hawthorne berry extract is widely used as a heart tonic, particularly in Europe.

Function

Plant extract --- Hawthorn extract

1. It dilates the arteries that supply the heart muscle itself with blood, oxygen, and fuel, providing a better supply of these essential nutrients. This results, with continued use, in a stronger, more efficient heart beat.
2. It acts as a powerful free-radical scavenger, protecting the heart against the harmful effects of lessened oxygen; a common result of vascular disease, such as atherosclerosis.
3. It can help steady the heartbeat if it is irregular, and does not lead to dependence.
4. It has mild sedative activity, which may be useful where mild heart disease is combined with
